DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Sarkar et al. (US 5,846,089).

With respect to claims 1-2, Sarkar et al. show in Fig. 5 a cross-flow fan 46 for a discharge excitation gas laser to circulated laser gas between electrodes disposed within a laser chamber in which laser gas is circulated, comprising a hollow cylindrical fan body with side plates, a plurality of blades disposed in a circumferential array and extending axially between the side plates, and a rotating shaft connected to the side plates for rotating the fan body, wherein the rotating shaft of the cross-flow fan passes through the center of the fan (col. 3, lines 21-40).

Art Unit: 2828

With respect to claims 3-4, Sarkar et al. show in Fig. 5 the outer diameter of the cross-flow fan 46 D and the outer diameter of the rotating shaft d 130 are sized clearly with the relationship $d/D \geq 0.13$.
